

JAYME DEHOYOS

FrontEnd Developer | Technical Support & Customer Operations

Castle Rock, CO · 720-955-6966 · jayme.dehoyos@csuglobal.edu
linkedin.com/in/jayme-dehoyos

SUMMARY

Web developer with a client-facing background spanning freelance site builds and healthcare data systems. Builds responsive websites end to end, develops data-collection interfaces in HTML, JavaScript, and React, and works directly with customers to translate requirements into working software. Completing a B.S. in Information Technology, minor in Marketing.

EXPERIENCE

Freelance Web Developer | *Self-Employed, Remote*

10/2021 – Present

- Design and build responsive, brand-aligned websites for small business clients, owning the process from discovery through launch.
- Serve as sole point of contact for clients, managing communication, scheduling, and deliverables across concurrent projects.
- Improve usability and accessibility through iterative design and systematic problem-solving.
- Apply AI-assisted development tooling (Cursor, Claude Code) to accelerate build and iteration cycles.
- Deliver consistently on tight timelines while maintaining client satisfaction and repeat engagements.

CereHealth Corp. | *Data Analyst · Littleton, CO (Remote)*

04/2022 – 06/2024

- Built data-collection user interfaces using HTML, JavaScript, and React for integration with external systems.
- Partnered directly with customers to design electronic questionnaires and data-collection screens to specification.
- Maintained and restructured databases, reorganizing data into accessible, query-ready formats.
- Debugged corrupted data and coding errors through systematic review of reports and performance indicators.
- Recommended system modifications to programmers, engineers, and management, strengthening data governance practices.
